Planning & Organization, Task
Coordination, Stackholder
Communication, Problem Solving,
Ubuntu, Centos, MacOS, AWS

EDUCATIONS

September 2015 - December 2019

STMIK DHARMA NEGARA

Computer and Information System

PROFESSIONAL SUMMARY

Experienced software developer prepared for this role. Skilled in programming languages, software design, and debugging. Strong focus on team collaboration and achieving results. Reliable, adaptable, and solution-focused.

WORK HISTORY

July 2025 - Current

System Analyst, PT. Sangkuriang

- Comprehensively analyzing system requirements from both technical and non-technical aspects.
- Designing system solutions and architecture based on the results of the requirements analysis.
- Creating and maintaining technical and functional documentation throughout the project lifecycle.
- Acting as the primary liaison between clients and the internal technical team.
- Actively collaborating with Project Managers, Developers, and QA to ensure development alignment.
- Providing technical support throughout all project phases, from implementation to maintenance.

January 2020 - February 2025

Software Engineer, PT. Emas Digital, Jakarta (Remote)

- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.
- Developed reusable components that significantly reduced development effort on multiple projects.
- Integrated third-party APIs to extend application functionalities and improve user experiences, leveraging external services for enhanced capabilities.
- Designed and implemented scalable applications for data extraction and analysis.
- Implemented continuous integration/continuous deployment (CI/CD) pipelines, reducing manual errors and deployment times.

June 2017 - December 2019

Full Stack Web Developer, PT. Agape Software Internasional, Jakarta

- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Provided technical mentorship to junior developers, fostering a collaborative learning environment within the team that encouraged professional growth for all members involved.
- Worked with back-end developers to design APIs.
- Developed functional databases, applications and servers to support websites on back-end.

June 2015 - April 2017

Programmer, PT. Ebdesk Teknologi, Jakarta

- Analyzed existing codebase, recommending improvements based on industry best practices.
- Developed in-house applications designed for company needs.
- Collaborated with other developers to refine software design.
